

Directors MISSION

BRENTON BETTS

Executive Director

At Fort Myers Beach Mosquito Control, our mission is to provide professional, responsive, and accountable mosquito control services that support the health, safety, and quality of life of the Fort Myers Beach community. As Executive Director, my commitment is to lead the District with integrity, transparency, and responsible stewardship of public resources while ensuring our team remains responsive to the needs of the residents and community we serve.

Effective mosquito control requires continuous monitoring, field operations, public education, accurate recordkeeping, and informed decision-making. We will continue to evaluate mosquito activity, respond to service requests, utilize appropriate control methods, and work collaboratively with our residents and community partners.

Our team is committed to maintaining professional standards, complying with applicable laws and regulations, and continually improving the District's operations and services.

Our responsibility is simple: to serve the community, protect public health, and carry out the District's mission with professionalism, accountability, and dedication.
